Best Execution Monitoring:

**Summary of analysis and conclusions
for the year ended 31 December 2017**

T.BAILEY

Requirement under Article 3(3) of MiFID RTS 28	T. Bailey Asset Management Limited Responses
<p>(a) an explanation of the relative importance the firm gave to the execution factors of price, costs, speed, likelihood of execution or any other consideration including qualitative factors when assessing the quality of execution;</p>	<p>T. Bailey Asset Management Limited generally gives the highest priority to total consideration, representing the price of the relevant financial instruments and the costs related to execution, in assessing execution quality. However, at our discretion we may prioritise other execution factors, including the impact on market prices of displaying and executing an order, the size and likelihood of execution and the availability of price improvement. We may prioritise such other factors to execute an order in full or where we determine that there are other circumstances such that obtaining the best immediately available price may not be the best possible result for the client.</p>
<p>(b) a description of any close links, conflicts of interests, and common with respect to any execution venues used to execute orders;</p>	<p>There are no close links, conflicts of interest or common ownerships in relation to any of the execution venues used by T. Bailey Asset Management Limited.</p>
<p>(c) a description of any specific arrangements with any execution venues regarding payments made or received, discounts, rebates or non-monetary benefits received;</p>	<p>No specific arrangement such as payments made or received, discounts, rebates or non-monetary benefits are in place with any of the execution venues used by T. Bailey Asset Management Limited.</p>
<p>(d) an explanation of the factors that led to a change in the list of execution venues listed in the firm's execution policy, if such a change occurred;</p>	<p>As this is the first report, there are no changes of note in the list of execution venues detailed in the firm's order execution policy. The execution venues listed in the summary were selected based on our best execution policy. The low number of relevant transactions in categories (a), (e) (ii) and (k) results in a small list for each category, i.e. less than 5. Given the investment approach taken by T. Bailey Asset Management Limited the majority of transactions undertaken in 2017 were in open ended collective investment schemes shown in category (m). In such cases, T. Bailey Asset Management Limited executes transactions directly with the manager or with the administrator appointed by the manager to the scheme.</p>

Requirement under Article 3(3) of MiFID RTS 28	T. Bailey Asset Management Limited Responses
(e) an explanation of how order execution differs according to client categorisation, where the firm treats categories of clients differently and where it may affect the order execution arrangements;	This is not applicable. All clients are professional clients.
(f) an explanation of whether other criteria were given precedence over immediate price and cost when executing retail client orders and how these other criteria were instrumental in delivering the best possible result in terms of the total consideration to the client;	This is not applicable. All clients are professional clients.
(g) an explanation of how the investment firm has used any data or tools relating to the quality of execution, including any data published under Commission Delegated Regulation (EU) .../...to be inserted before publication [RTS 27];	<p>As data published under Delegated Regulation (EU) 2017/575 (RTS27) is yet to be published, no use has been made of this data.</p> <p>Given the small number of transactions we have undertaken in the period 1 January 2017 to 31 December 2017 inclusive that are within the scope of Directive 2014/65/EU we have reviewed each individual transaction. For transactions in categories (a), (e)(ii) and (k), the execution price is compared to the relevant market average price. For transactions in category (m) the execution price is compared to the published price for the relevant valuation point.</p> <p>As a result of this analysis, T. Bailey Asset Management Limited is satisfied that it has adhered to the requirements set out in its execution policy in seeking to obtain best execution for its clients.</p>
(h) where applicable, an explanation of how the investment firm has used output of a consolidated tape provider established under Article 65 of Directive 2014/65/EU.	This is not applicable as there are currently no consolidated tape providers in Europe.
