

## KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

### T. Bailey Growth Fund X Accumulation, ISIN: GB00BGYBJ143

The Authorised Fund Manager of this Fund is: T. Bailey Fund Services Limited.

#### Objectives and Investment Policy

The T. Bailey Growth Fund aims to provide capital growth in excess of the IA Global Sector average over Rolling Periods of 3 years (after charges).

Typically, at least 80% of the Fund will be invested in other collective investment vehicles ("funds") which provide indirect exposure to equities in the UK and internationally. Such funds may include those managed or operated by the Manager and its associates.

To the extent not fully invested in such funds, the Fund may invest in other funds and/or directly in shares, debt instruments (e.g. bonds), money market instruments, cash and near cash.

Through its investments in other funds, the Fund may also be exposed to a range of other asset classes such as government and corporate debt, money market instruments, currencies, property, commodities, infrastructure, deposits, cash and near cash on both a UK and a global basis.

The Fund is actively managed, taking into account the Investment Manager's views on growth opportunities and investment themes. Investment themes drive the selection of assets, focusing on areas where demand is robust and is likely to exceed supply for the foreseeable future (for example, technology, healthcare, materials, sustainability). This emphasis on global themes highlights higher growth opportunities irrespective of geography.

The weighting of the asset classes to which the Fund is exposed may be varied depending on the Investment Manager's views in the context of achieving the investment objective and at any one time the Fund may be exposed to a diversified range of industry sectors, currencies or geographies in various proportions.

The Fund can use a range of different active and passive managers in order to provide a diversity of style to protect against possible periods of poor performance by any one manager or product.

The fund may use derivatives to reduce risk or cost or to generate additional capital or income at proportionate risk (known as "Efficient Portfolio Management").

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

The Fund is not managed to generate an income. Any income arising from the Fund is reinvested. In other words all units are accumulation units.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

#### Risk and Reward Profile

The Risk and Reward Indicator below demonstrates in a standard format where the Fund ranks in terms of its potential risk and reward. It is based on historical performance data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking. The higher the rank the greater the potential reward but the greater the risk of losing money.

- The Fund is in the above risk category because it invests in UK and overseas shares and the unit price has experienced high rises and falls in value in the past.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The Fund invests in global shares, with some regions being regarded as more risky. The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

## Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
<b>Entry charge</b>	nil
<b>Exit charge</b>	nil
This is the maximum that might be taken out of your money before it is invested/ before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
<b>Ongoing charges</b>	1.61%
Charges taken from the Fund under specific conditions	
<b>Performance fee</b>	nil

The **ongoing charges** figure is based on the expenses incurred by the Fund (annualised) for the six months ended 30 September 2019.

The figure may vary from year to year. The figure includes the weighted average ongoing charges figure of the funds invested in. It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian and any entry/ exit charge paid when buying or selling units in another fund.

For details of the actual charges, please contact your financial adviser/distributor.

## Past Performance (Share class launch date 3 January 2019)

As the launch date of the share class is 3 January 2019, the share class does not have performance data for one complete calendar year, so there is insufficient data available to provide a useful indication of past performance to investors.
