

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

T. Bailey Dynamic Fund X Accumulation, ISIN: GB00BGYBJ259

The Authorised Fund Manager of this Fund is: T. Bailey Fund Services Limited.

Objectives and Investment Policy

The Fund aims to outperform the Consumer Prices Index plus 3% per annum, over Rolling Periods of 3 years.

Typically, at least 80% of the Fund will be invested in other collective investment vehicles ("funds"), including those managed or operated by the Manager and its associates.

Through investments in these other funds, the Fund is exposed to a range of asset classes such as equities, government and corporate debt, money market instruments, currencies, property, commodities, infrastructure, deposits, cash and near cash on both a UK and a global basis.

The Fund is actively managed, taking into account the Investment Manager's views on growth opportunities and investment themes.

Investment themes driving the selection of assets include areas where demand is robust and is likely to exceed supply for the foreseeable future (for example, technology, healthcare, materials, sustainability). This focus on global themes highlights higher growth opportunities irrespective of geography.

The weighting of the asset classes to which the Fund is exposed may be varied depending on the Investment Manager's views in the context of achieving the investment objective and at any one time the Fund may be exposed to a diversified range of asset classes, sectors, currencies or geographies in various proportions.

The Fund will use a range of different active and passive managers in order to provide a diversity of style to protect against possible periods of poor performance by any one manager or product.

To the extent not fully invested in collective investment vehicles, the Fund may invest directly in other equities, debt instruments, money market instruments, cash and near cash.

Derivatives may be used for efficient portfolio management purposes to reduce risk or cost or to generate additional capital or income.

Investors can redeem units on demand, at the daily valuation point of 12 noon (UK time) when this is a normal business day in the UK.

For income units, any income received is paid out to you quarterly. For accumulation units, any income received is reflected in the price of units.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money in the short-term (within 5 years). The Fund should be viewed as a medium to long-term investment only.

Risk and Reward Profile

The Risk and Reward Indicator below demonstrates in a standard format where the Fund ranks in terms of its potential risk and reward. It is based on historical performance data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking. The higher the rank the greater the potential reward but the greater the risk of losing money.

- The Fund is in the above risk category because it invests in a variety of asset classes, but with a bias towards shares.
- The lowest category does not mean a fund is a risk free investment.
- The value of investments may go down as well as up in response to general market conditions and the performance of the assets held. Investors may not get back the money which they invested.
- There is no guarantee that the Fund will meet its stated objectives.
- The Fund invests in global shares, with some regions being regarded as more risky. The movements of exchange rates may lead to further changes in the value of investments and the income from them.
- Whilst the intention of using derivatives is to reduce risk, this outcome is not guaranteed and derivatives involve additional risks which could lead to losses.
- There is a risk that any company providing services such as safe keeping of assets or acting as counterparty to derivatives may become insolvent, which may cause losses to the Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	nil
Exit charge	nil
This is the maximum that might be taken out of your money before it is invested/ before the proceeds of your investment are paid out.	
Charges taken from the Fund over a year	
Ongoing charges	1.00%
Charges taken from the Fund under specific conditions	
Performance fee	nil

The **ongoing charges** figure is based on the expenses incurred by the Fund (annualised) for the six months ended 30 September 2020.

The figure may vary from year to year. The figure includes the weighted average ongoing charges figure of the funds invested in. It excludes payments related to interest on borrowing and portfolio transaction costs, except in the case of transaction fees payable to the custodian and any entry/ exit charge paid when buying or selling units in another fund.

Ongoing charges are deducted from capital which will assist the income yield but may constrain capital growth.

For details of the actual charges, please contact your financial adviser/distributor.

Past Performance (Share class launch date 3 January 2019)

- The Past Performance chart shows annual performance, in GBP, for each full calendar year since launch.
- Past performance is not a reliable indicator of future results.
- Performance is shown inclusive of all charges.
- Performance is shown on a total return basis (on the basis that distributable income has been reinvested).
- Bank of England's preferred measure of UK inflation is currently Consumer Price Index ("CPI") which is published monthly.
